• Our consumer data is continuously updated and processed against both the USPS National Change of Address (NCOA) and Delivery Sequence File (DSF), producing a database that is highly deliverable (93% or better in most cases). The information is also carrier route and ZIP+4 coded using the USPS certified Coding Accuracy Support System (CASS).

• Our data which consists of consumers and consumer household is transaction driven and derived from the internet, direct mail, and new card issues. Data consists of buyers and responders to various offers including products and services relating to credit and financial services, health and beauty, and general merchandise. All Internet data is confirmed opt-in and goes through strict hygiene standards to ensure quality.

• Selections are available through our unique multifaceted data overlay approach which appends information to transactional data using credit, public record, survey and census data information.
