IMS Direct Mail Credit Apps are consumers responding to a direct mail solicitation for a catalog card. They have applied and paid a nominal fee to have access to a web mall where they can purchase various products, such as electronics, home furnishing and clothing. In addition to the luxury of shopping, all approved applicants receive the benefit of improving their credit as all activity is reported back to the bureaus. This file would work well for any credit incentivised offer, business opportunity, magazine solicitations, credit offers, debt consolidation, and much more.

• Our consumer data is continuously updated and processed against both the USPS National Change of Address (NCOA) and Delivery Sequence File (DSF), producing a database that is highly deliverable (93% or better in most cases). The information is also carrier route and ZIP+4 coded using the USPS certified Coding Accuracy Support System (CASS).

• Selections are available through our unique multifaceted data overlay approach which appends information to transactional data using credit, public record, survey and census data information.
